

## Guided drives DFM/DFM-B

**FESTO**

Festo core product range  
Covers 80% of your automation tasks

Worldwide:

Always in stock

Superb:

Festo quality at an attractive price

Easy:

Simplified procurement and warehousing

★ Generally ready for dispatch from the factory within 24 hours

In stock at 13 Service Centres worldwide

More than 2200 products

★ Generally ready for dispatch from the factory within 5 days

Assembled for you at 4 Service Centres worldwide

Up to  $6 \times 10^{12}$  variants per product family

Just look  
for the  
star!

## Characteristics

### At a glance

Drive and guide unit in a single housing

Sturdy and precise

High resistance to torques and transverse loads

- Minimal space requirement
- Minimal mounting time
- Choice of compressed air supply ports
- Wide range of mounting options
- Good protection against torsion
- High rigidity
- Maintenance-free
- With plain-bearing guide: high rigidity thanks to large-diameter guide rods and four plain-bearing bushes
- With recirculating ball bearing guide: for applications involving torque loads

### Wide choice of variants

Guided drive DFM

- Basic drive with strokes of up to 200 mm

Guided drive DFM-B

- Drive with strokes of up to 400 mm
- With precision adjustment of end positions
- With pneumatic cushioning, adjustable PPV
- With shock absorber, self-adjusting, progressive

### Application examples

#### Clamping

The guided drive is perfectly suited to clamping components for reliable further processing.

#### Lifting

The guided drive effortlessly transports and lifts loads of over 200 kg, powerfully and dynamically.

#### Stopping

Loads of up to 150 kg are stopped reliably and safely, making the guided drive a resilient and sturdy stopper cylinder.

## Characteristics

### Use in conveyor systems

Lifting

Pushing

Stopping

Stopping via stop bracket

It is recommended to fit a buffer on the workpiece carrier.

### Mounting options

Flat from above

Flat from underneath

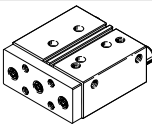

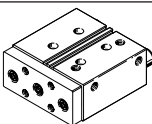

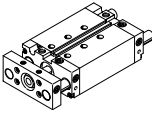

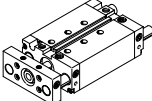

On the side from underneath

On the end face

Product range overview

## Peripherals overview

Piston diameter 6, 10

Piston diameter 12 ... 100

Accessories		For piston diameter	Description	→ Page/Internet
[1]	Push-in fitting QSM/QS	6 ... 100	For connecting compressed air tubing with standard O.D.	qs
[2]	One-way flow control valve GRLA	6 ... 100	For speed regulation	72
[3]	Proximity switch SMT-10G	6, 10	Insertable in the slot lengthwise	70
[4]	Proximity switch SME-/SMT-8	12 ... 100	Can be integrated in the profile barrel	71
[5]	Slot cover ABP-5-S	12 ... 100	For protecting the sensor cable and the sensor slots from contamination	72
-	Centring sleeves ZBH	12 ... 100	4 or 6 pieces included in the scope of delivery	70
-	Adapter	12 ... 100	For drive/drive connections	73
		12 ... 100	For drive/gripper connections	grippers

 **Note**

Only the following push-in fitting/one-way flow control valve may be used in combination with proximity switch SMT-10G:

- QSM-M3-2-I
- GRLA-M3

### Extremely functional

Direction of movement

Excellent protection against torsion, high resistance to torques and transverse loads

Data sheet

www.festo.com  
Piston diameter  
12 ... 100 mm

- - Diameter  
6 ... 100 mm
- - Stroke length  
5 ... 200 mm

**General technical data**

Piston diameter	6	10	12	16	20	25	32	40	50	63	80	100
Pneumatic connection	M3	M3	M5	M5	M5	G1/8	G1/8	G1/8	G1/4	G1/4	G3/8	G3/8
Design	Piston											
	Piston rod											
	Guide rods with yoke											
Cushioning	Elastic cushioning rings/plates at both ends											
Position sensing	Via proximity switch											
Type of mounting	With through-hole											
	With female thread											
Mounting position	Any											
Protection against torsion/guide	Guide rod with yoke/with plain-bearing or ball bearing guide											

**Operating and environmental conditions**

Piston diameter	6	10	12	16	20	25	32	40	50	63	80	100
Operating pressure [bar]	2 ... 8	1.5 ... 8	2 ... 10			1.5 ... 10			1 ... 10	0.5 ... 10		
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]											
Note on operating/pilot medium	Lubricated operation possible (in which case lubricated operation will always be required)											
Ambient temperature <sup>1)</sup>												
DFM-...-GF [°C]	-10 ... +60		-20 ... +80									
DFM-...-KF [°C]	-		-5 ... +60									
Corrosion resistance CRC <sup>2)</sup>	1											
ATEX	Selected types → <a href="http://www.festo.com">www.festo.com</a>											

1) Note operating range of proximity switches

2) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

**Speeds [m/s]**

Piston diameter	6	10	12	16	20	25	32	40	50	63	80	100
<b>Cushioning P</b>												
Maximum speed, advancing	1.3	1.7	0.8	0.8	0.8	0.8	0.8	0.8	0.6	0.6	0.4	0.4
Maximum speed, retracting	1.1	1.6	0.8	0.8	0.8	0.8	0.8	0.8	0.6	0.6	0.4	0.4

Data sheet

Forces [N]												
Piston diameter	6	10	12	16	20	25	32	40	50	63	80	100
Theoretical force at 6 bar, advancing	17	47	68	121	188	295	482	754	1178	1870	3016	4712
Theoretical force at 6 bar, retracting	13	40	51	90	141	247	415	686	1057	1750	2827	4418

Impact energy [J]												
Piston diameter	6	10	12	16	20	25	32	40	50	63	80	100

## Data sheet

### Use as a stopper cylinder

When used as a stopper cylinder, only guided drives with plain-bearing guide DFM-...-GF may be used.

In addition, the distance  $l_{max}$  (→ drawing) must not be exceeded.

The permissible kinetic impact energy at the end stop must also not be exceeded.

$$l_{max} = \text{stroke } l + \text{height of stop bracket } L$$

$$l_{max} = 50 \text{ mm}$$

### Impact mass m as a function of the impact velocity v

#### DFM-12 ... 25-GF, stroke < 30 mm

- DFM-12
- · - · - · DFM-16
- - - - - DFM-20
- · · · · DFM-25

The values in the above graph are based on the assumption that the workpiece carrier is fitted with a flexible buffer with deformation of 1 mm. Only guided drives with a plain-bearing guide GF < 30 mm stroke may be used.

#### DFM-32 ... 100-GF, stroke < 50 mm

## Data sheet

### Characteristic load values for recirculating ball bearing guide KF

The indicated forces and torques refer to the guide centre.

If the guided drive is simultaneously subjected to several of the indicated forces and torques, the following equation must be satisfied in addition to the indicated maximum loads:

Calculating the load comparison factor:

$$f_v = \frac{|F_{y1}|}{F_{y2}} + \frac{|F_{z1}|}{F_{z2}} + \frac{|M_{x1}|}{M_{x2}} + \frac{|M_{y1}|}{M_{y2}} + \frac{|M_{z1}|}{M_{z2}} \leq 1$$

## Data sheet

### Calculation of the service life for recirculating ball bearing guide KF

The service life of the guide depends on the load. To provide a rough indication of the service life of the guide, the graph below plots the load comparison factor  $f_v$  against the service life ratio  $q$ .

These values are only theoretical. You must consult your local contact person at Festo for load comparison factors  $f_v$  greater than 1.5.

#### Load comparison factor $f_v$ as a function of service life ratio $q$

Example: The effect on the service life, deviating from the specified reference service life, can be determined by the service life ratio  $q$ :

Given:

Reference service life = 10000 km

Required service life = 3000 km

$$q = \frac{3000 \text{ km}}{10000 \text{ km}} = 0.3$$

The graph gives a load comparison factor  $f_v$  of 1.5. This means that the permissible total load can be utilised up to 150%.

 **Note**  
Engineering tool

→ [www.festo.com/engineeringtools](http://www.festo.com/engineeringtools)

$f_v > 1.5$  are only theoretical comparison values.

### Calculation example

L1 = centre of gravity of the moving mass of the guided drive

L2 = centre of gravity of payload

L3 = centre of gravity of the entire moving mass

Length measurements should be provided with plus/minus signs as shown in the figure:

L3 > 0 = centre of gravity of the moving mass is on the payload side

L3 < 0 = centre of gravity of the moving mass is on the guide side

L4 = load side

L5 = guide side

Given:

- Guided drive: DFM-32-80-KF
- Stroke length:  $H = 80 \text{ mm}$
- Centre of gravity of payload:  $L_{\text{Load}} = 35 \text{ mm}$
- Payload:  $m_{\text{Load}} = 10 \text{ kg}$
- Acceleration:  $a_x = 2 \text{ m/s}^2$ ,  $a_y = a_z = 0 \text{ m/s}^2$

To be calculated:

- Loads  $F_{y_{\text{dyn}}}/F_{z_{\text{dyn}}}$  and  $M_{x_{\text{dyn}}}/M_{y_{\text{dyn}}}/M_{z_{\text{dyn}}}$
- Verification of operation with combined load
- Expected service life

## Data sheet

## Calculation example

Solution:

Moving mass:

 $m_b$  = moving mass of guided drive $m_{Load}$  = payload

$$m_{b\_total} = m_b + m_{Load}$$

From table → page 10

$$m_b = 1.173 \text{ kg}$$

$$m_{b\_total} = 1.173 \text{ kg} + 10 \text{ kg} = 11.173 \text{ kg}$$

## Centre of gravity of the moving mass

$$L_{b\_ges} = \frac{L_1 \cdot m_1 + L_b \cdot m_b}{m_{b\_ges}}$$

 $L_b$  = centre of gravity of the moving mass of the guided drive $m_b$  = moving mass of guided drive $L_{Load}$  = centre of gravity of payload $m_{Load}$  = payload

From table → page 10

$$L_b = 54.7 \text{ mm}$$

$$L_{b\_ges} = \frac{(+35 \text{ mm}) \cdot 10 \text{ kg} + (-54.7 \text{ mm}) \cdot 1.173 \text{ kg}}{11.173 \text{ kg}} = 25.6 \text{ mm}$$

Length measurements should be provided with plus/minus signs as shown in the figure:

 $L_{b\_total} > 0$  = centre of gravity of the moving mass is on the payload side $L_{b\_total} < 0$  = centre of gravity of the moving mass is on the guide sideLoads  $F_{y\_dyn}/F_{z\_dyn}$  and  $M_{x\_dyn}/M_{y\_dyn}/M_{z\_dyn}$ 

$$F_{y\_dyn} = m_{b\_total} \times a_y = 11.173 \text{ kg} \times 0 \text{ m/s}^2 = 0 \text{ N}$$

$$F_{z\_dyn} = m_{b\_total} \times (g + a_z) = 11.173 \text{ kg} \times (9.81 \text{ m/s}^2 + 0 \text{ m/s}^2) = 110 \text{ N}$$

From table → page 20

$$\text{Dimension X} = 56.5 \text{ mm}$$

$$M_{y\_dyn} = F_{z\_dyn} \times (\text{dimension X} + \text{stroke} + L_{b\_total}) = 110 \text{ N} \times (56.5 \text{ mm} + 80 \text{ mm} + 25.6 \text{ mm}) = 17.8 \text{ Nm}$$

$$M_{z\_dyn} = F_{y\_dyn} \times (\text{dimension X} + \text{stroke} + L_{b\_total}) = 0 \text{ N} \times (56.5 \text{ mm} + 80 \text{ mm} + 25.6 \text{ mm}) = 0 \text{ Nm}$$

## Verification of operation with combined load

Max. values from table → page 21

$$F_{y\_max} = 1130 \text{ N}$$

$$F_{z\_max} = 1130 \text{ N}$$

$$M_{x\_max} = 44.09 \text{ Nm}$$

$$M_{y\_max} = 28.83 \text{ Nm}$$

$$M_{z\_max} = 28.83 \text{ Nm}$$

$$f_v = \frac{|F_{y1}|}{F_{y2}} + \frac{|F_{z1}|}{F_{z2}} + \frac{|M_{x1}|}{M_{x2}} + \frac{|M_{y1}|}{M_{y2}} + \frac{|M_{z1}|}{M_{z2}} \leq 1$$

$$f_v = \frac{0 \text{ N}}{1130 \text{ N}} + \frac{110 \text{ N}}{1130 \text{ N}} + \frac{0 \text{ Nm}}{44.09 \text{ Nm}} + \frac{17.8 \text{ Nm}}{28.83 \text{ Nm}} + \frac{0 \text{ Nm}}{28.83 \text{ Nm}} = 0.72 \leq 1$$

## Expected service life

 $L_1$  = reference service life

$$L = \frac{L_1}{f_v^3} = \frac{10000 \text{ km}}{0.72^3} = 27000 \text{ km}$$

Data sheet

Dimensions

Download CAD data → [www.festo.com](http://www.festo.com)

Diameter 20 ... 25 mm

[1] Mounting slot for proximity switches SME-/SMT-8

[2] Compressed air supply port optionally at the side or on top

[3] Mounting thread  
[4] Mounting thread (not with diameter 20)

[5] Tolerance between the centring holes ± 0.02 mm

Note

If the guide rods project beyond the contour of the housing in the retracted end position (→ dimension L7), an appropriate recess must be provided in the mounting surface when the unit is mounted on its end face so that the guide rods can move freely.

Festo core product range

Generally ready for dispatch from the factory within 24 hours

Generally ready for dispatch from the factory within 5 days

Peripherals overview

DFM-B-12-P

DFM-B-12-P-AJ

 **Note**  
Proximity switches SM...O-8E cannot be used with the DFM-B.

## Peripherals overview

Accessories		Description	→ Page/Internet
[1]	Push-in fitting QS	For connecting compressed air tubing with standard O.D.	qs
[2]	Proximity switches SME-/SMT-8/10	Can be integrated in the profile barrel	71
[3]	Slot cover ABP-5-S	For protecting the sensor cable and the sensor slots from contamination	72
[4]	One-way flow control valve GRLA	For speed regulation	72
-	Centring sleeves ZBH	4 or 6 pieces included in the scope of delivery	70

### Variants

DFM-B-...-P (stroke 400 mm)

DFM-B-...-PPV

DFM-B-...-AJ-EJ

DFM-B-...-YSRW

General technical data									
Piston diameter	12	16	20	25	32	40	50	63	
Pneumatic connection	M5	M5	M5	G1/8	G1/8	G1/8	G1/4	G1/4	
Design	Piston								
	Piston rod								
	Guide rods with yoke								
Cushioning									
DFM-...-P	Elastic cushioning rings/plates at both ends								
DFM-...-PPV	Pneumatic cushioning, adjustable at both ends								
DFM-...-YSRW	Self-adjusting at both ends								
Cushioning length									
DFM-...-PPV	[mm]	-	12	15	15	16	17	19	19
Position sensing	Via proximity switch								
Type of mounting	With through-hole								
	With female thread								
Mounting position	Any								
Protection against torsion/guide	Guide rod with yoke/plain-bearing or recirculating ball bearing guide								
<b>Variant AJ</b>									
Setting range	[mm]	0 ... 10							
<b>Variant EJ and YSRW</b>									
Setting range	[mm]	-	-	0 ... 10					
<b>Variant YSRW with shock absorber</b>									
Repetition accuracy	[mm]	-	-	max. 0.05					

† . Note: This product conforms to ISO 1179-1 and ISO 228-1.

## Data sheet

Operating and environmental conditions								
Piston diameter	12	16	20	25	32	40	50	63
Operating pressure [bar]	2 ... 10			1.5 ... 10			1 ... 10	
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]							
Note on operating/pilot medium	Lubricated operation possible (in which case lubricated operation will always be required)							
Ambient temperature <sup>1)</sup>								
DFM-...-GF [°C]	-20 ... +80							
DFM-...-KF [°C]	-5 ... +60							
DFM-...-YSRW [°C]	0 ... +60							
DFM-...-S6 [°C]	0 ... +120							
Corrosion resistance CRC <sup>2)</sup>								
DFM-...-GF	2							
DFM-...-S6	2							
ATEX	Selected types → <a href="http://www.festo.com">www.festo.com</a>							

1) Note operating range of proximity switches

2) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

Speeds [m/s]								
Piston diameter	12	16	20	25	32	40	50	63
<b>Cushioning P, precision stroke adjustment AJ and EJ</b>								
Maximum speed advancing, retracting	0.8	0.8	0.8	0.8	0.8	0.8	0.6	0.6
<b>Cushioning P, plain-bearing guide GF in combination with S6</b>								
Maximum speed advancing, retracting	0.5	0.5	0.5	0.5	0.5	0.5	0.4	0.4
<b>Cushioning PPV, YSRW, PPV S6</b>

### Note

If the guide rods project beyond the contour of the housing in the retracted end position (→ dimension L7), an appropriate recess must be provided in the mounting surface when the unit is mounted on its end face so that the guide rods can move freely.

When using a variable stroke, the dimensions L1, L2, L7, L9 and L11 correspond to the next longest standard stroke.

1) Tolerance between the centring holes

‡ Note: This product conforms to ISO 1179-1 and ISO 228-1.

**Note**

If the guide rods project beyond the contour of the housing in the retracted end position (→ dimension L7), an appropriate recess must be provided in the mounting surface when the unit is mounted on its end face so that the guide rods can move freely.

When using a variable stroke, the dimensions L1, L2, L7, L9 and L11 correspond to the next longest standard stroke.
